Subject: Microsoft Settlement

Microsoft has long used its monopoly power to make it impossible for competitors in non-OS fields to survive, by copying their innovations into Windows, under the guise of their right to "innovate". They have never innovated. They have only used their monopoly power to copy the innovators and put them out of business.

It is anti-competitive behavior at its worst.

This MUST stop.

Please do the responsible thing and MAKE IT STOP.

As the president of a software company that greatly fears the possibility that microsoft will copy what we do and use their monopoly power against us, I ask you, Please, please do the right thing.
